Proposal for Donor Funding Support: Sustainable Agricultural Development Project

Project Overview:

We are thrilled to present a transformative agricultural project focused on cultivating Mango trees, Banana, Coconut, Avocado, and Rice to enhance agricultural sustainability and support local communities. Our project emphasizes environmental conservation, community empowerment, and economic growth through innovative agricultural practices.

Why do we plant a tree?

Every minute, a forest area equivalent to 27 soccer fields is lost, primarily due to human activities. This shocking data signifies the urgency of our mission. The act of planting a tree holds more significance than one might initially realize. Trees sequester carbon, contributing to offsetting carbon emissions. They play a vital role in preserving biodiversity by creating habitats for countless species and maintaining the balance of our ecosystems. Furthermore, reforestation efforts stimulate local economies, provide job opportunities, and improve the quality of life for communities around the world.

Project Details:

- **Land Rental:** Securing 4 hectares of land for agricultural activities to promote sustainable crop cultivation.
- **Worker Support:** Employing 2 skilled workers to oversee daily operations and ensure optimal crop growth.
- **Operation and Infrastructure:** Implementing essential operations and infrastructure improvements to enhance agricultural efficiency and productivity.
- **Tree Planting:** Planting a diverse range of 2500 trees, including Mango, Banana, Coconut, Avocado, and Rice, to enrich biodiversity and promote food security.

Location of the project:

#116D, Russian Federation Boulevard (110), Sangkat Srah Chak, Khan Duan Penh, 120201, Phnom Penh, Cambodia.

See the Google map here! <https://maps.app.goo.gl/Zx25eBk6nK1Zva9HA>

Financial Breakdown:

- Land Rental (4 Hectares): \$2000 per year
- Worker Expenses (2 Persons): \$6000 per year
- Operation Cost: \$500
- Building Infrastructure (Wall): \$1500
- Project Administration Fee: \$1440
- Cost of Trees (2500 trees): \$12500

Total Annual Expenses: \$23540

Impact and Sustainability:

The income generated from the produce will directly benefit impoverished families in the community, fostering economic empowerment and social well-being. Our project aims to create a self-sustaining agricultural model that not only supports local livelihoods but also contributes to environmental conservation and food security.

Funding Request:

We are seeking your generous support to help cover the annual expenses of this impactful agricultural initiative. Your contribution will enable us to create a lasting impact by promoting sustainable agriculture, empowering communities, and fostering economic resilience.

Conclusion:

Join us in making a difference by supporting our sustainable agricultural development project. Together, we can cultivate a brighter future for communities in need and build a more resilient and prosperous agricultural sector.

Proposal for Donor Funding Support:
Sustainable Agricultural Development Project

Date of project: 9.9.2024

Proposed Budget: \$23540
