Proposal for Donor Funding Support: Water Well

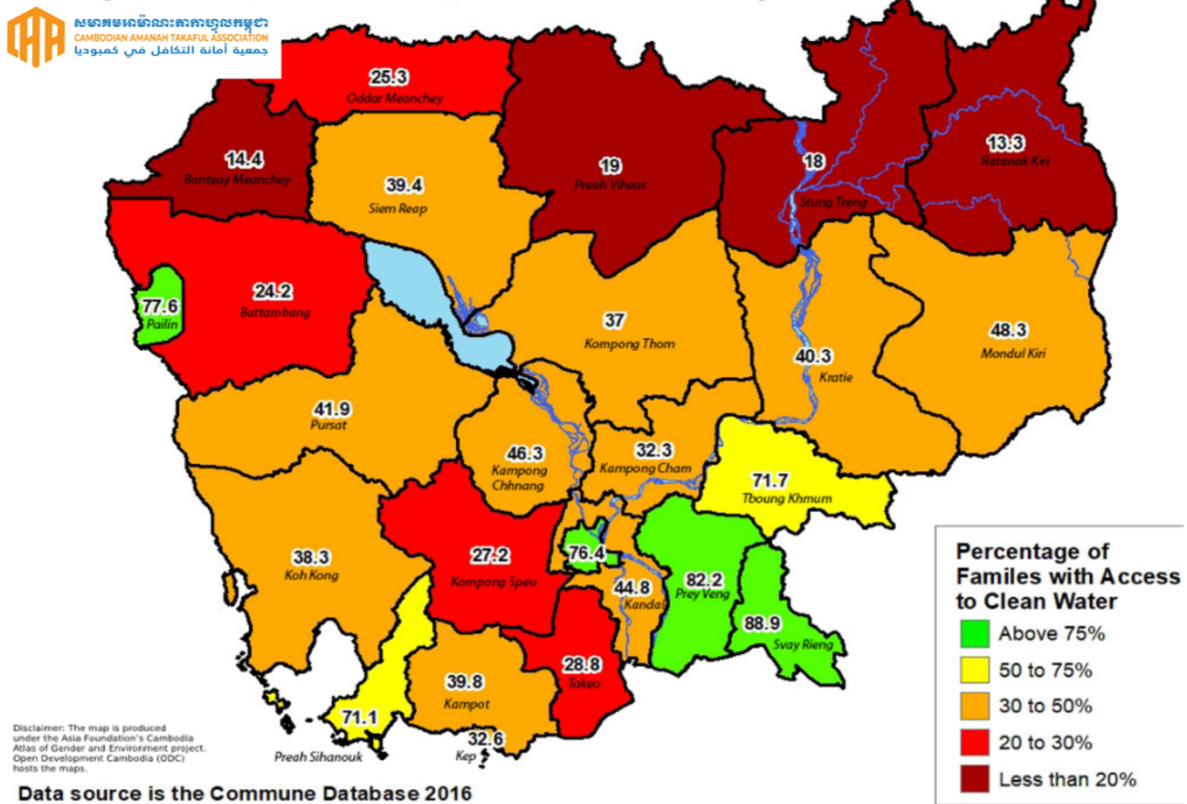

Introduction:

Teuk Phos district in Kampong Chhnang Province is currently facing a critical water supply issue during the dry season. The district, home to 18,674 families and 15,628 students in the 2023-2024 academic year, encompasses a total area of 176,386 hectares. Immediate intervention is required to ensure access to clean and reliable water sources for the community.

Statistics Area of the need for water supply:

Percentage of families with piped water, private pump well or private ring well, usable year round, at their house, or less then 150m away.

Objectives:

- **Sustainable Water Supply:** To provide a sustainable and reliable water supply to the residents of Teuk Phos district.
- **Address Water Scarcity:** To tackle the pressing water scarcity issue faced by the community, particularly during the dry season.
- **Health Improvement:** To enhance the overall health and well-being of the population by ensuring access to clean water.

Proposed Solution:

We are collaborating with partners/donors to construct **2 water wells** strategically located across the Teuk Phos district to maximize coverage and accessibility for residents. Each well will be equipped with a pump and filtration system to ensure the delivery of clean and safe drinking water.

Target Beneficiaries:

- **Families:** 18,674 families residing in the Teuk Phos district.
- **Students:** 15,628 students attending schools in the district.
- **Local Communities:** Farmers, residents, and businesses that will benefit from improved water access.

Budget Breakdown:

- **Water Pumps for 25 units:** \$7,000.00
- **Water Pumps with Motor for 25 units:** \$7,500.00
- **Administration Costs:** Including community awareness and training programs, yearly reports for 5 years, and maintenance: \$5,437.50
- **Total Budget: \$41,687.50**

Implementation Plan:

- **Site Assessment:** Identify suitable locations for water well construction based on community needs and geographical factors.
- **Procurement:** Secure necessary materials and equipment for good construction.
- **Engagement:** Work with local contractors and labor for the construction process.
- **Installation:** Install pumps and filtration systems to ensure water quality.
- **Community Training:** Conduct training sessions on well-maintenance and hygiene practices.
- **Monitoring:** Implement a regular maintenance schedule to ensure the sustainability of the wells.

Call to Action:

We are seeking support from generous donors the fund the construction of these water wells in the Teuk Phos district. Your contribution will have a profound impact on the lives of thousands of residents and students. Together, we can provide the vital necessity of clean water to those in need.

For International Transfers, please use the following details:

- **International Transfer:** ABA Swift Code: AKHPP
- **Account Number and Name:** ABA BANK 800002025 (Cambodian Amanah Takaful Association, CATA)
